Welcome page

Register user

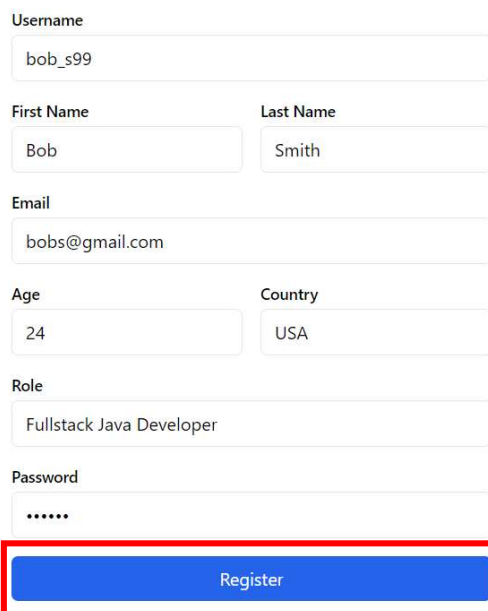

1. Click "Register"

The screenshot shows a login and registration interface. On the left, under 'Welcome back!', there are input fields for 'User ID', 'Username', and 'Password', followed by a green 'Login' button. On the right, under 'New here?', there is a green 'Register' button, followed by the text 'or', and then a green 'Browse' button which is highlighted with a red rectangle. The 'Browse' button is labeled 'Continue as guest'.

2. Fill out the form and click "Register"

Create your free account

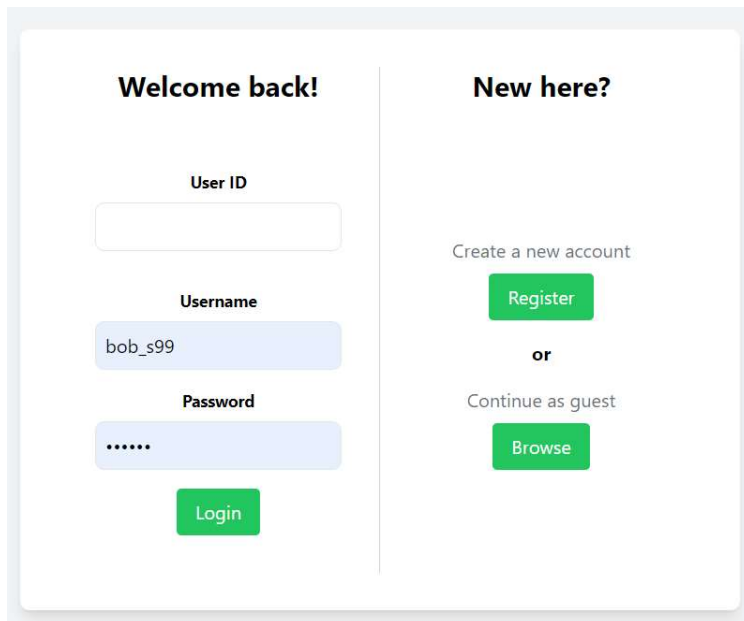

The screenshot shows a registration form titled 'Create your free account'. It contains the following fields: 'Username' (filled with 'bob_s99'), 'First Name' (filled with 'Bob') and 'Last Name' (filled with 'Smith'), 'Email' (filled with 'bobs@gmail.com'), 'Age' (filled with '24') and 'Country' (filled with 'USA'), 'Role' (filled with 'Fullstack Java Developer'), and 'Password' (filled with '*****'). At the bottom, there is a blue 'Register' button highlighted with a red rectangle.

3. User has been created and you will be redirected to the "Explore" page

Login User

1. Fill out the login-form and click “Login”

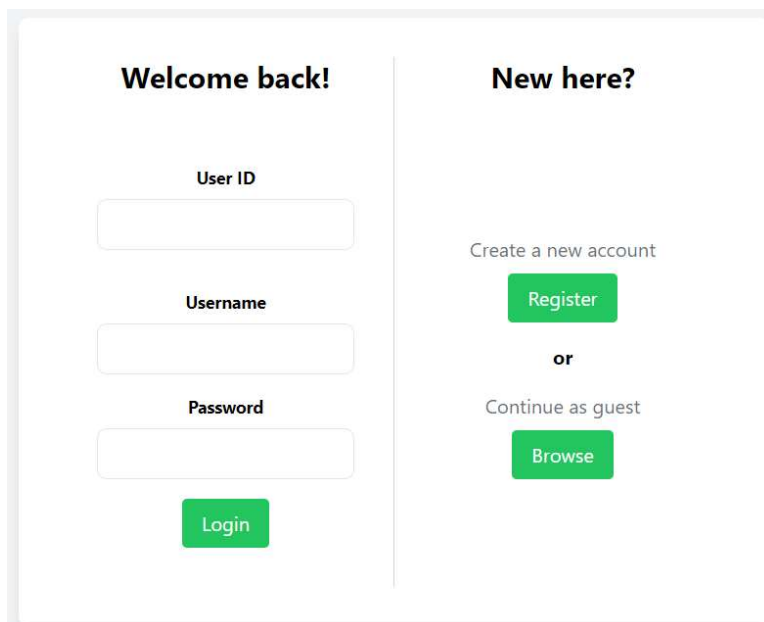

The image shows a login form with two main sections: 'Welcome back!' and 'New here?'. The 'Welcome back!' section contains three input fields: 'User ID' (empty), 'Username' (containing 'bob_s99'), and 'Password' (containing six dots). Below these fields is a green 'Login' button. The 'New here?' section contains a link 'Create a new account' above a green 'Register' button, followed by the word 'or', and then a link 'Continue as guest' above a green 'Browse' button.

2. You are now logged in and redirected to the “Explore” page

Browse as guest

1. Click on “Browse”

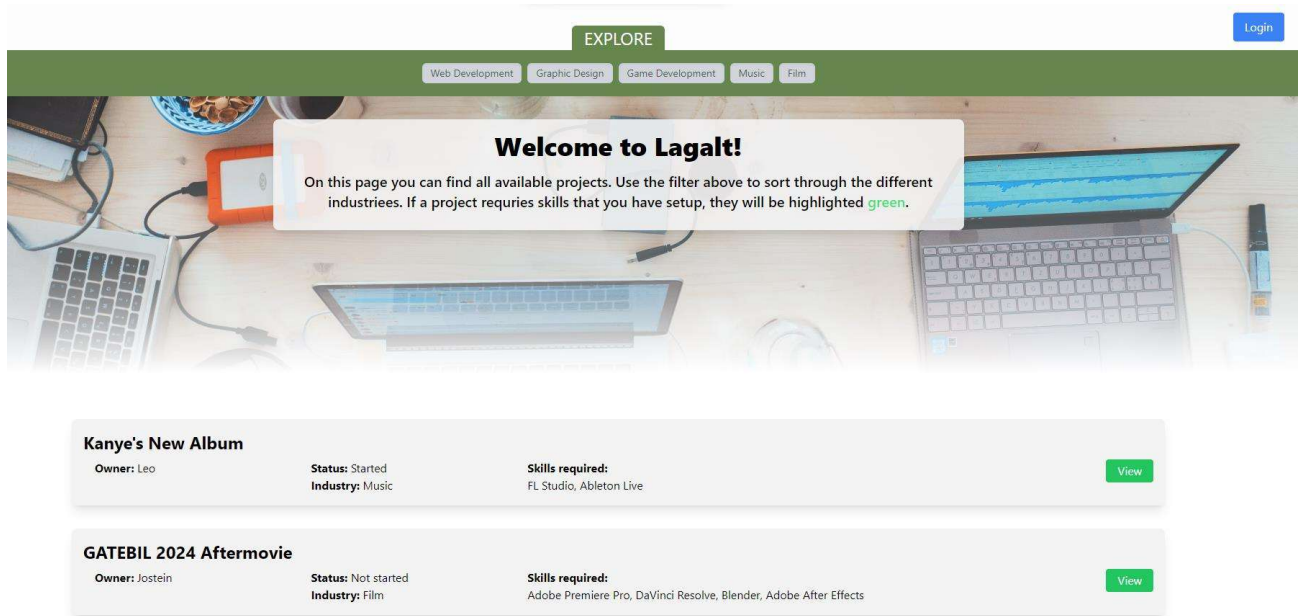

The image shows the same login form as above. In this state, the 'User ID' and 'Username' fields are empty, and the 'Password' field is also empty. The 'Login' button is still present. The 'New here?' section remains the same, with 'Register' and 'Browse' buttons.

2. You can now browse the “Explore” page with limited access

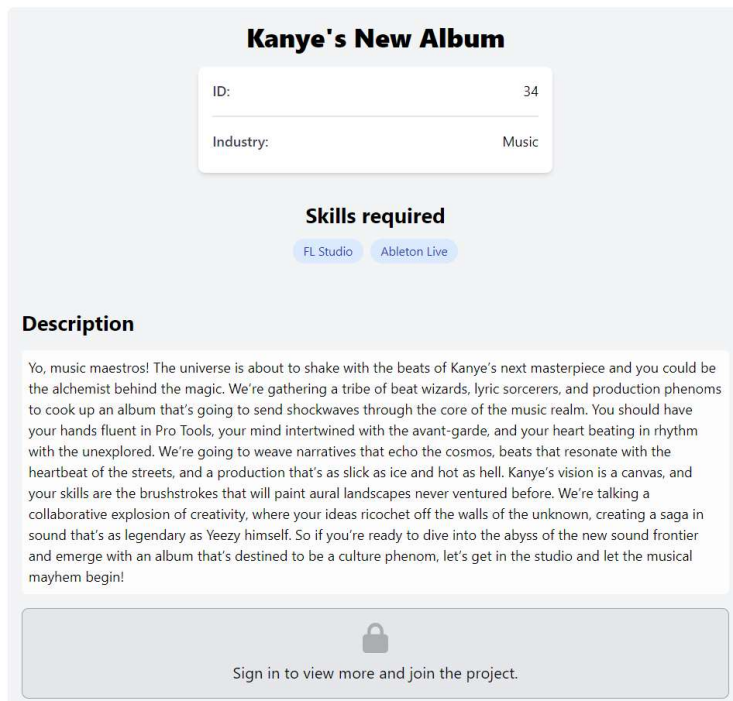

Explore page

Kanye's New Album

ID: 34

Industry: Music

Owner: Leo

Skills required
FL Studio Ableton Live

Description

Yo, music maestros! The universe is about to shake with the beats of Kanye's next masterpiece and you could be the alchemist behind the magic. We're gathering a tribe of beat wizards, lyric sorcerers, and production phenoms to cook up an album that's going to send shockwaves through the core of the music realm. You should have your hands fluent in Pro Tools, your mind intertwined with the avant-garde, and your heart beating in rhythm with the unexplored. We're going to weave narratives that echo the cosmos, beats that resonate with the heartbeat of the streets, and a production that's as slick as ice and hot as hell. Kanye's vision is a canvas, and your skills are the brushstrokes that will paint aural landscapes never ventured before. We're talking a collaborative explosion of creativity, where your ideas ricochet off the walls of the unknown, creating a saga in sound that's as legendary as Yeezy himself. So if you're ready to dive into the abyss of the new sound frontier and emerge with an album that's destined to be a culture phenom, let's get in the studio and let the musical mayhem begin!
